

Mr Harpaul Flora
MBBS BSc MSc FRCS (Gen Surg)
Consultant Vascular Surgeon

Mr Paul Flora is a Consultant Vascular Surgeon at St Barts and Royal London NHS Trust. He has 15 years' experience in endovascular and advanced laparoscopic (keyhole) surgery for a variety of vascular problems. Mr Flora can accept adult instructions for the claimant or defendant.

His particular areas of expertise include:

- endovascular aortic aneurysm surgery
- varicose veins (EVLT, Venefit, and glue)
- deep venous disease
- carotid disease
- stroke
- diabetic foot disease
- peripheral arterial disease
- pressure sores and wounds
- Thoracic outlet syndrome
- vascular tumours

Medicolegal Partners have an experienced team skilled in all aspects of the administration involved in instructions to our various expert medical witnesses. This leaves experts free to utilise their precious time to focus on giving you and your client their medical and medico legal expert advice and support. You, or an agency working with you, can pick up the phone and speak to us any time.

“ It is a pleasure to work with Medicolegal Partners. Their reports are thorough, and they turn around reports in good time. They respond promptly to queries, and understand the litigation process. ”

PROFESSIONAL EXPERIENCE

Consultant Vascular and General Surgery *(July 2016 - present)*

St Bartholomew's and The Royal London Hospital, London

Clinical Network Director for Vascular Surgery *(July 2016 - present)*

Responsible for the strategic and operational oversight of the vascular practice across the acute hospitals within Barts Health NHS Trust (The Royal London Hospital, St Bartholomew's Hospital, Whipps Cross Hospital, Newham University Hospital)

Clinical Lead Vascular Surgery, Barts Health NHS Trust *(April 2013 - present)*

Clinical Director, North East London AAA Screening Programme *(September 2012 - 2018)*

General Surgery NTN in the NE Thames Region *(April 2001)*

Open vascular/endovascular surgery and hybrid techniques in treat vascular diseases.

- Aortic aneurysms (thoracic, infrarenal)
- Peripheral aneurysms (femoral, popliteal, visceral)
- Peripheral arterial disease
- Varicose veins
- Carotid disease
- Thoracic outlet syndrome
- Popliteal entrapment syndrome
- AV malformations
- Sympathectomy: cardiac and for hyperhidrosis

Lead vascular surgeon on multi-disciplinary cases where specialist vascular input is required:

- Removal of complex neck tumours with ENT or Maxillo-facial surgeons, where carotid reconstruction is necessary
- Supporting Urology and Endocrine surgeons where adrenal/renal tumours invade the IVC and reconstruction may be necessary

- Providing spine surgeons access support by mobilising the aorta or IVC for anterior approaches to the vertebral column. 15 years' experience of undertaking anterior approach spine surgery having done in excess of 600 cases

General/ Laparoscopic surgery

- Hernia repair
- Appendectomy
- Cholecystectomy
- Trauma

INNOVATIONS

Barostim Therapy

Performed the first Barostim implant surgery in the UK on two patients at the Royal London Hospital. This is a new treatment for patients with resistant hypertension for whom no current treatment works. Currently our collaboration has won a Barts Charities grant to treat a further 30 patients.

Cardiac Thoracoscopic Sympathectomy

Google Glass to perform vascular surgery. My team was the first to perform an Open AAA and Carotid Endarterectomy procedures using this technology to further the teaching and training experience

CALM study: Use of carotid stent to treat resistant hypertension
